^{1.} Final assignment for Course 2 1 / 1 point In order to solve this assignment, please follow the steps below: STEP 1: Download the Excel workbook, save it on your device and open it. C2 Final Assessment.xlsx STEP 2: Follow the instructions in order to answer the guiz guestions. You will need to perform each task on your worksheet and then type in the solution into the Quiz answer boxes. Good luck with this final assessment for the course. You have worked hard to get here. Trust your skills and get into it. All the best, Your Excel-Team Here is your first question: Have a look at the first 3 worksheets, they contain student marks for 3 terms. Now go to the Final Marks worksheet and use 3D-Formulas to get Benjamin Abbot's class test average for terms 1, 2 and 4. Copy the formula across to 14 and then down for the rest of the students. What was the Average Final Mark (as shown in cell M4)? Please enter the number with one decimal ##.# 62.6 Great work! The Average Final Mark was 62.6 2. Note that you have a sheet called Marks Term 3 but it is not in the right position. Move this sheet to sit between the sheets Marks Term 2 and Marks Term 4. Check the Final Marks Sheet, what is the average Final Mark now? Please enter the number with one decimal ##.# 62.7 ✓ Correct Good job! The average Final Mark is now 62.7 3. Select the range A3:J465 and use Create from Selection to name each of the columns of data. This should have 1 / 1 point corrected the missing stats figures. What was the median Final Mark (M5)? Please enter the number with one decimal ##.# 63.8 ✓ Correct

4. Select the range L20:M26 and name it Grades. This should have corrected the grades calculations. What grade did Olivia 1/1 point Jones get?

Yes, that is correct. The median Final Mark was 63.8

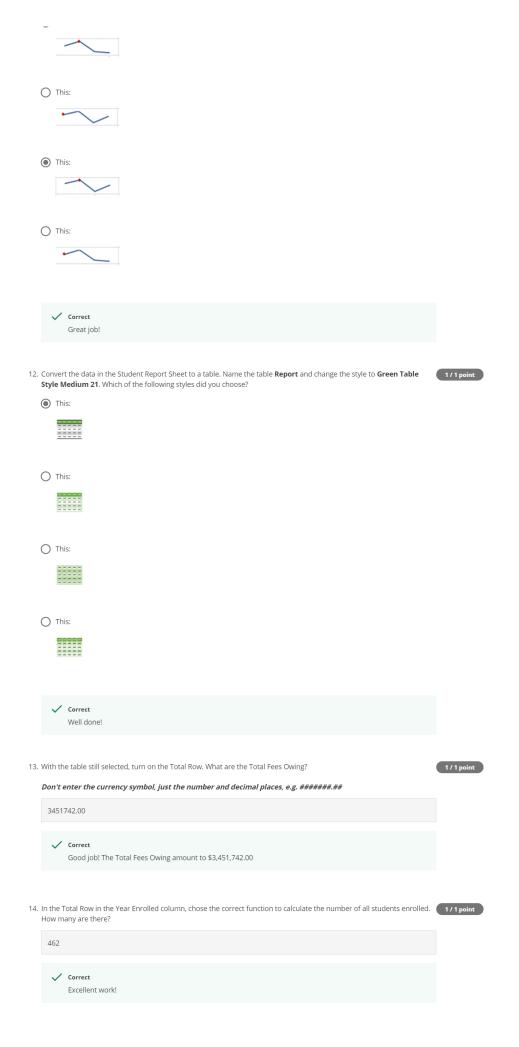

Well done!

	Correct	
242		
followe	It two digits of the student number indicate the year the student enrolled. In F4 create a formula that will put "20" and by the last two digits of the Student ID, e.g. 2015. Copy the formula down for all the other students. What is the of the check digit in S6 ?	1 / 1 poir
~	Correct Good job!	
311		
followe	reate a formula to generate the student email address. This should be their first initial, followed by their surname, ad by "@newcollege.com", and must all be in lower case, e.g., babbot@newcollege.com. Copy the formula down for other students. What is the value of the check digit in S5 ?	1 / 1 poir
~	Correct Well done!	
662		
return correct	he Student Report worksheet. Some of the information still needs to be completed. Create a formula in D4 to the Student's full name, this should be First Name followed by a space and then Surname. The case must also be ted so that all words start with a capital letter but everything else is in lower case e.g., Benjamin Abbot. Copy the a down for all the other students. What is the value of the check digit in S4 ?	1 / 1 poir
~	Correct Well done! There were 3 students absent for more than 15 days.	
3		
We nee Sheet. look a	look at the worksheets Absences Term 1 through to Term 4, they contain a list of dates that students were absent. ad to create a summary showing a count of how many days each student was absent. Go to the Absence Report Click in A4 , and then use the Consolidate tool to consolidate the data on the other Absences sheets. The results bit odd, but that is because the count values have been formatted as dates. Change the formatting to General or er. Sort the data by Total Absences. How many students were absent for more than 15 days?	1 / 1 poir
✓	Correct Excellent job!	
Ye Bli	ue	
_	range	
down a should	create a mixed reference formula that will count how many of Mr Chang's students got a Fail. Drag the formula and across to complete the table. Observe P5 , which shows the number of A's achieved by Ms Sekibo's students. It have changed colour. What colour is it now?	1 / 1 poir
~	Correct Well done!

11. We would like to get an idea of how students have progressed over the year. Click in M4 and create a sparkline line chart that charts the data in cells I4:L4. Copy the sparkline down for all the other students. Change the sparkline to show the highest point. Which of these sparklines represents Olivia Jones' data?

	Filter th	e table to show all Distance Learning students who owe more than \$9,000. How many are there?	1 / 1 point
	41		
	/	Correct Fantastic!	
16.	pivot ta	ild like to compare the results for different types of students. Clear all filters. Use the data in the table to create a ble (in a new sheet) that shows Grade in the Row Labels, Student Type in the Column Labels, and Count of Grade alues section. How many A's did the Part Time Students get?	1/1 point
	33		
	_	Correct Good work!	
17.		the pivot to show the values as a percentage of the column total. What percentage of Part Time students failed?	1 / 1 point
		nter the percentage symbol, please just enter the number as ##.## (2 decimal places).	
	12.88		
	_	Correct	
		Good work!	
	He wou table to Chang.	ng has observed that the students attending the college seem to be increasingly more able and more motivated. Id like to see if there is a pattern in the results based on enrolment date. Click in A17 and create another pivot show the average final mark by enrolment date. Add a filter field and change the filter to only show data for Mr Format the values to only show 2 decimal places. What was the Average mark for 2017?	1/1 point
	68.05	enter the number with two decimal places.	
	✓	Correct Well done! The Average mark for 2017 was 68.05	
19.	A17:B2	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in On and just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the ed value?	1/1 point
19.	A17:B2	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in O and just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the	1/1 point
19.	A17:B2	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in a not part of the chart. What is the ed value? **Ended of the chart	1/1 point
19.	R-squar	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in a not part of the chart. What is the ed value? **Ended of the chart	1/1 point
19.	R-squar Please	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in D and just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the ed value? **enter the number as **.**** (4 decimal places). Correct	1/1 point
19.	R-squar Please	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in 0 and just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the ed value? enter the number as #.#### (4 decimal places).	1/1 point
19.	R-squar Please	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in D and just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the ed value? **enter the number as **.**** (4 decimal places). Correct	1/1 point
	A17:B2I R-squar Please 0.948	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in D and just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the ed value? **enter the number as **.**** (4 decimal places). Correct	
20.	A17:B20 R-squar Please 0.948	a Clustered Column pivot chart using the data in the second pivot table (if you have Excel for Mac select the data in a not just create a regular chart). Add a linear trendline and display the R-squared value on the chart. What is the ed value? **enter the number as **.**** (4 decimal places).** Correct Well done - the R-squared value is 0.9481 look at the other trend line options and select the one that returns the best R-squared value. Forecast forward for
